

EvolutionPA

ABSTRACT

With the publication of the three-year plan for information technology in the Public Administration, since 2017 the PA has generated new growth opportunities in the medium-long term. This is how EvolutionPA was born, a strategic plan through which Parsec 3.26 aims at a decisive **expansion of software design, development and integration activities**, and services connected directly and indirectly to the digital PA.

EvolutionPA is an integrated investment program for an industrial project that has the overall objective of leading the company towards a radical new configuration. The programme aims to:

- strong **innovation of products and services** already marketed
- better performance of the production value in terms of System Integration and Software Development
- **Organizational** innovation to reformulate processes in the new dimension of medium-sized companies and to prepare for innovation of the business model and **new value chains**
